

# Flex2Crystal™

The future of Crystal Reports for VDF

*mertechdata*

# Flex2Crystal

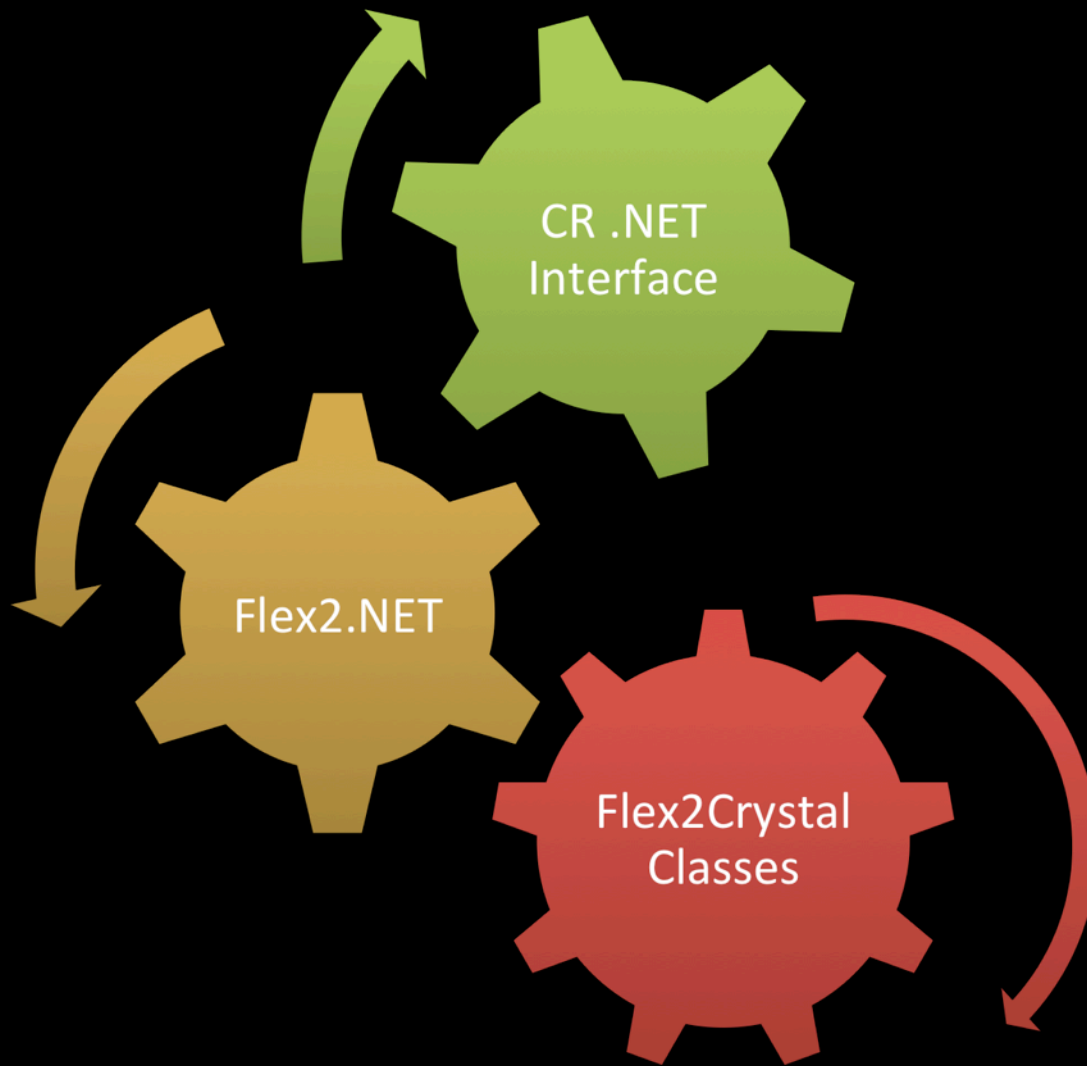

- Will run existing reports with new Crystal
- Will integrate with Visual DataFlex Studio
- Will have an integrated viewer (first)
- Will not support native DataFlex database

# Flex2Crystal

- Will have library for VDF 12.1 or later
- Will have packages for older VDF versions
- Will support new Crystal features
- Will be easy to install and distribute

# Why

- Developers want it!
- Fits into our business model
- Challenging
- Two birds with one stone!

# Flex2.NET

- An engine to consume .NET controls
- Generates COM from .NET assemblies
- Crystal is first test
- Topic for another webinar

CTP: Dec 15th!

```
graph TD; A[CTP: Dec 15th!] --> B[Beta: February 2012]; B --> C[Release: March 2012]
```

Beta: February 2012

Release: March 2012

# What's next

- Your feedback suggestions
- Over to Oliver

# Upgrading a report

## As easy as C-C-C

*mertechdata*

**Code Time!**

# 1. Change Includes

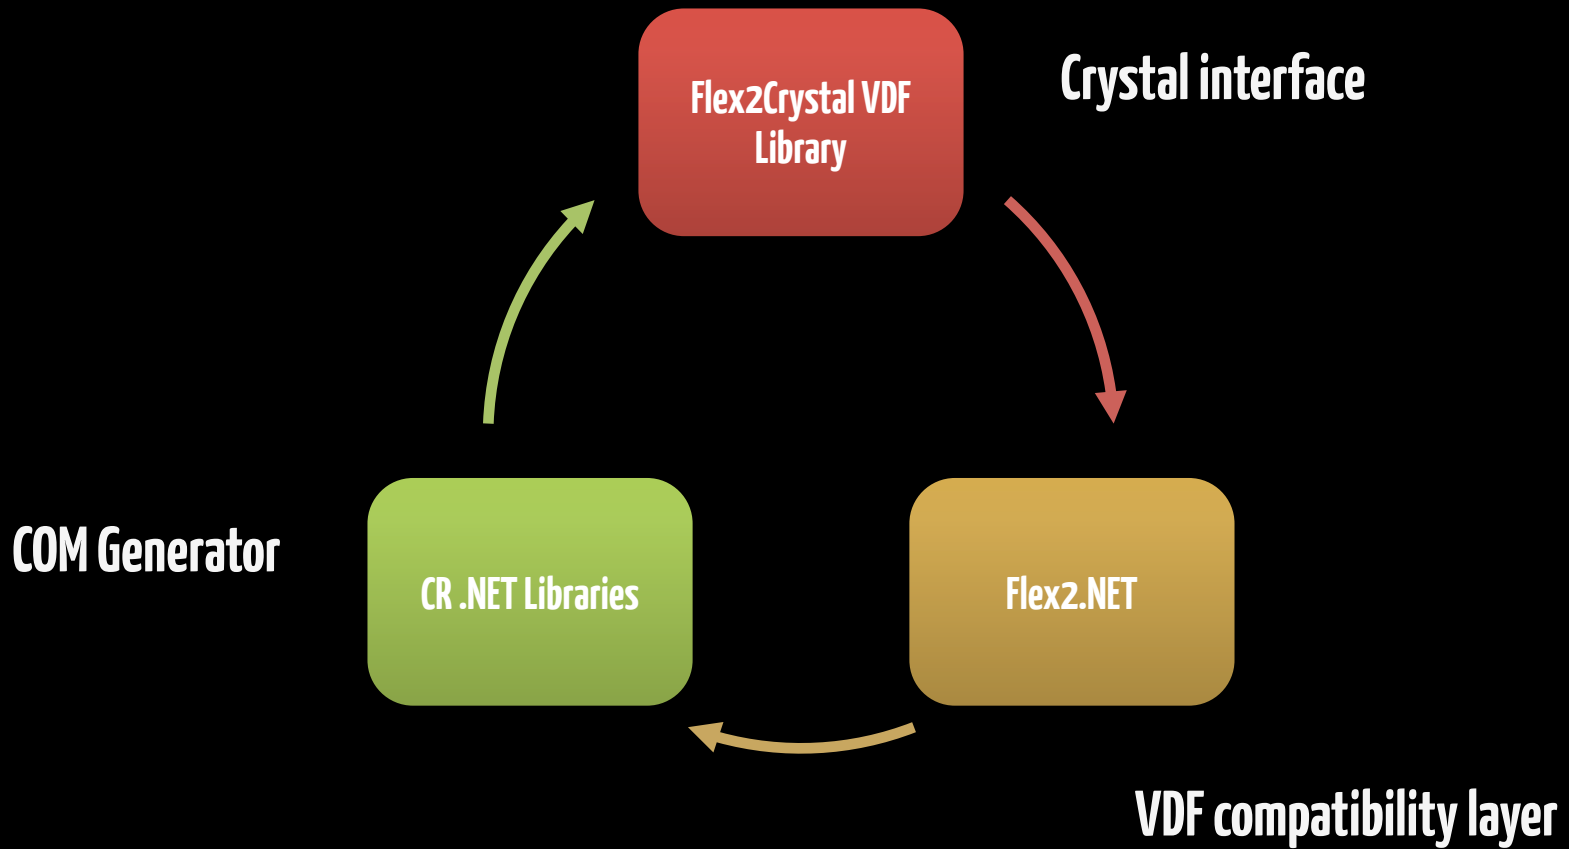

Change `"Use Crystal\CheckForCrystal.dg"`  
to  
`"Use CheckForFlex2Crystal.dg"`

# 2. Connect to F2C

Replace `"cCrystal"` with `"cFlex2Crystal"`

# 3. Compile!

# Flex2Crystal Components

# Features

- ✓ Sort Fields
- ✓ Parameters  
(More on this later)
- ✓ Formula Fields
- ✓ CDOs
- ✓ Sub Reports
- ✓ Export Formats
- ✓ Selection Formulae
- ✓ ADO.NET

# Why should I UPGRADE?

*mertechdata*

- Use Crystal 2011 in VDF 12.1-16.1
- Support from SAP for CR 2011
- **New Features!**

# New Features

**Built-in barcodes**  
**Read-only Viewer**  
**Parameter Panel**  
**Interactive Viewer**  
**Portrait/Landscape!**

- Code 39 Built-in
- Others available at:  
[azalea.com/crystal-reports](http://azalea.com/crystal-reports)

# Read Only Reports

## Quid Pro Quo

- Data source location can't be set
- Can't create Formula Fields programmatically
- Can't set selection formula programmatically

You must edit existing sorts and use Parameters instead of formula fields & Selection Formulae

**Code Time!**

**New Features mean  
NEW INTERFACE**  
(that's a good thing, I promise)

*mertechdata*

# Legacy "Parameter" Method:

```
Send AssignFormula of hoReport "CustomerState"  
"CA"
```

## New Method:

```
Handle hoParam  
Get GetParamObjectByName of hoReport "CustomerState" ;  
to hoParam  
If (hoParam) Send ComAddCurrentValue of hoReport "CA"
```

# Legacy Sort Method:

```
Send AppendSortField of hoReport "Customer" "Name"  
iSortDirection
```

# New Method:

```
Handle hoSortField  
Get GetSortFieldByName of hoReport "{Customer.Name}" to hoSortField  
If (hoSortField) Begin  
    OLEF2CSortDirection iSort  
    If (bDesc) Move OLEF2CSortDirection_DescendingOrder to iSort  
    Else Move OLEF2CSortDirection_AscendingOrder to iSort  
    Set ComSortDirection of hoSortField to iSort  
End
```

# Portrait/Landscape Support

**Deprecated!**

# CDO Support

**CDO = Crystal Data Objects**

**A means to pass data from a programmatically  
Generated in-memory array**

**TTX files describe the format of the data.**

# ADO.NET Support

New flavor of the decade...

**ADO.NET is the primary means of connecting to data sources nowadays in MS products.**

**XSD files describe the data sources.**

**Q/A**
